## HELP FOR INDEPENDENT SENIORS

PEACE OF MIND FOR THEIR FAMILIES

**O**ur Personal Emergency Response System provides easy, rapid 24/7/365 access to certified Emergency Medical Technicians (EMTs).

Just one push of a button on a wristwatch, pendant or console instantly connects the caller to the LifeCall Response Center, where Certified EMTs effectively communicate the caller's condition, and provide vital medical history to the paramedics en route, remaining on the line until help arrives. The EMT will also notify both loved ones and you that a medical emergency has occurred.

With a PERS from LifeCall, seniors are never alone, and their families rest easier knowing that the medical expertise their loved ones desperately need in an emergency, is just one push of a button away.

## PARTNER WITH LIFECALL AND BOOST YOUR BOTTOM LINE

**LifeCall's Affinity Program provides you with:**

- ✓ A resource for developing and maintaining a trusting and caring relationship with customers who remain in their own homes.
- ✓ A growth generating revenue stream.

The Affinity Program **does not require any financial investment**, and is completely administered by LifeCall. Merchandising, customer enrollment, shipping, handling, and billing are all managed by us. Revenue sharing begins when your customer subscribes to our monthly monitoring service, and is paid to you every 30 days for the duration of the program.

The Partnership Referral Program is an excellent vehicle for building loyalty, retaining customers seeking medical alert services, and attracting new prospects.

## TRUST LIFECALL FOR PEACE OF MIND

YOU CAN COUNT ON

**L**ifeCall has more than 35 years of experience in life safety and security systems. It is one of the leading providers of in-home health care monitoring solutions for seniors and at-risk persons seeking to retain their independence and remain in their own homes.

Our UL-listed Emergency Response Center is fully redundant. Every piece of critical computer and communications equipment has a replacement. Battery backups and natural gas powered generators provide an uninterrupted power supply. Two underground fiber optic lines, each linked to a separate phone company office, ensure consistent telecommunication service.

So, very much like a seatbelt that secures you in an accident, we'll be there when you need us the most.
